

Optical Components • Out-Sourcing • Supply-Chain Solutions

Optical Filters: IR-Blockers & Precision Colour

High-durability optical coatings for effective control of heat, and precise control of colour. Filters can be designed and produced for custom applications and in prototyping volume.

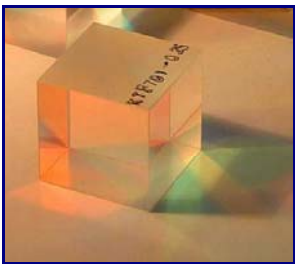

Optical Elements: Prisms, Lenses & Windows

Glass optical component manufacture, using modern and accurate production technology. Economical batch sizes can be produced for new-product development & start-up volume.

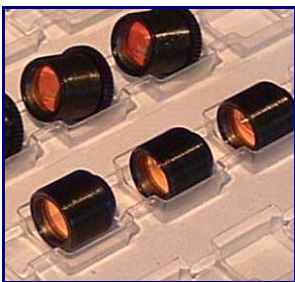

Plastic Optics: Injection Formed Components

High-clarity precision moulded plastic optical elements. Manufactured in Classified Cleanrooms, using latest CNC injection systems for efficient production in high-volume.

Projection Optics: X-Cube Colour Assemblies

Sharp colour definition & precise alignment are features of the X-Cube range. Prisms are designed for high-intensity colour projection applications in; 0.7-inch, 0.9-inch and 1.3-inch nominal formats.

Imaging Optics: CMOS & Compact Lens Assemblies

Miniature lens assemblies, comprising glass or plastic elements, for high-volume imaging applications. Complete design & manufacture service.
